2. *Arm* camera – via remote controller
3. *Review* images on *any* computer

Ultra low-power portable camera...

- Up to **9 weeks** standby with the included rechargeable battery
- Optionally the can be connected to mains power

High quality security images...

- BlueEye captures images when movement is detected
- Security-grade image capture with embedded digital watermark
- Images are time & date stamped with digital signature
- Privacy ensured – images can be digitally encrypted
- Stores up to 65,000 still images on removable storage, then optionally overwrites the oldest images
- Security images can be reviewed on any computer
- Colour camera (mono camera option available)

Optionally integrate into your alarm

- BlueEye can seamlessly integrates into any new/existing alarm system
- Can be a drop-in replacement for existing motion detectors (PIR)
- Can be installed together with identical looking PIRs
- Fast and easy setup – camera comes pre-configured with all necessary settings

BlueEye

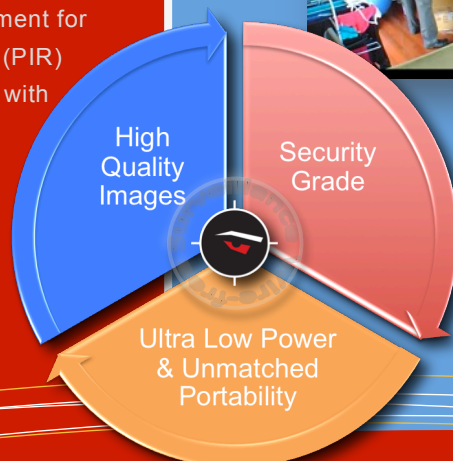

The next generation of security & surveillance devices

Wire-free - no wiring costs!

Patented low power design, up to 9 weeks operation with the standard battery option

Optional integration with your alarm

A revolution in portable surveillance and security

The ultra low-power "Eye Series" cameras are the first to incorporate PSIS, a technique where a surveillance camera operates between CCTV & Digital Still Camera modes. This allows critical images of events (attacks, vandalism, thefts) to be captured and stored in high resolution without the usual degradation in quality of CCTV still images.
