

Wire-free Indoor Vandal Proof Security Camera

High quality, compact indoor digital surveillance camera housed in a lockable stainless steel case

Simple "Set & Forget" operation

1. *Position* camera – no cabling
2. *Arm* camera – simply turn it on!
3. *Review* images on *any* computer

Ultra low-power portable camera

- Up to **9 weeks** standby with the included rechargeable battery
- BlueEye Secure can also plug directly into main power

High resolution security images

- BlueEye Secure captures images when the inbuilt motion sensor detects movement
- Security-grade image capture with embedded digital watermark
- Programmable image sequence
- Images are time & date stamped with digital signature
- Privacy ensured – images can be digitally encrypted
- Stores up to 65,000 still images on removable storage, then optionally overwrites the oldest images

Modular options

- BlueEye Secure can be interfaced with alarms or other devices with internal expansion board

Benefits of BlueEye Secure

- The robust and lockable housing ensures that the camera cannot be dishonestly removed or the security images accessed
- Quick to install, easy to manage, simple to review footage
- Ideal for public spaces (eg. schools, hospitals) and remote buildings (eg. tool sheds)

BlueEye *Secure*

The next generation of security and surveillance devices

Standalone - no cables or wiring

Robust lockable stainless steel housing

Patented low power design - up to 9 weeks with standard battery option

Compact design for covert monitoring

Half the cost

... twice the quality

A revolution in portable surveillance

The ultra low-power "Eye Series" cameras are the first to incorporate PSIS, a technique where a surveillance camera operates between CCTV & Digital Still Camera modes. This allows critical images of events (attacks, vandalism, thefts, and terrorism) to be captured and stored in high resolution without the usual degradation in quality of CCTV still images.
