# Eye Series

Mi5 introduces the Eye Series of portable surveillance cameras *never before has surveillance been so simple & affordable!*

Wire-free portability  
simple installation with no cabling costs!

Unmatched battery performance  
up to 39 weeks before needing to recharge

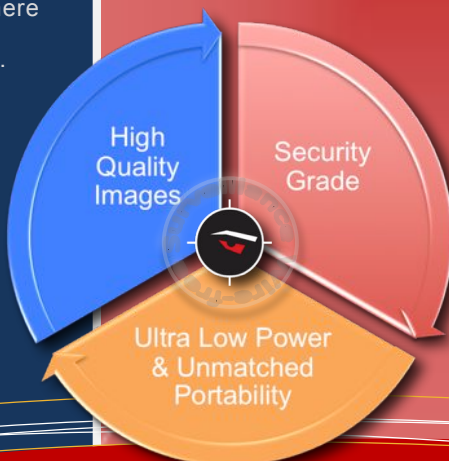

*Clean Technology* - Integrated solar options  
your battery may *never* need to be recharged

Set and Forget operation  
Easy and Fast to *position, set and forget!*

High quality security grade images

Flexible add-ons include night vision, wireless modem, remote triggering & external interfaces

Store up to 65,000 images and easily view your images on any computer

### A revolution in portable surveillance

The ultra low-power "Eye Series" cameras are the first to incorporate PSIS, a technique where a surveillance camera operates between CCTV & Digital Still Camera modes. This allows critical images of events (attacks, vandalism, thefts) to be captured and stored in high resolution without the usual degradation in quality of CCTV still images.
